

**2nd INTERNATIONAL CONFERENCE ON
TRANSGLUTAMINASES & PROTEIN
CROSS-LINKING REACTIONS**

June 24 - 28, 1990

Hotel Montfleury

Cannes, France

Monday	June 25, 1990	Transglutaminases, Cellular Ageing and Apoptosis
	Chairpersons:	<i>P. Davies</i> <i>R. Schmidt</i>
08:30		Apoptosis and Tissue Transglutaminase <i>L. Fesus</i>
09:00		Tissue Transglutaminase Expression in Tumours is Connected to their Apoptotic Rate <i>M. Piacentini</i>
09:30		Transglutaminase, Apoptosis and Tumour Progression <i>M. Griffin</i>
10:00		Abnormal Increase of Transglutaminase Activity in Endothelial Cells Exposed to Ionizing Gamma Radiation <i>G. Korner</i>
10:15		Mallory Bodies Contain High Amounts of ϵ -(γ -Glutamyl)-Lysine Cross-Links <i>K. Zatloukal</i>
10:30		Coffee break
11:00		Transglutaminase Regulation in Human Cells <i>P.J. Birckbichler</i>
11:30		Retinol-Induced Morphological Changes of Cultured Bovine Endothelial Cells are Accompanied by a Marked Increase of Transglutaminase <i>K. Nara</i>
11:45		Cross-Linking of Lipocortin I by Tissue Transglutaminase <i>Y. Ando</i>
12:00		The $N\epsilon$ - γ (Glutamic)-Lysine-Crosslinked Matrix is a Universal Intracellular Structure <i>A.G. Loewy</i>
