

## ***Transglutaminase 2: a double face enzyme***

***Call for papers 2016***

Special edition of *Amino Acids* by

S. Beninati, M. Piacentini and C.M. Bergamini (editors)

*Amino Acids* is pleased to announce the publication of the 3<sup>rd</sup> special issue addressed to the scientific community working on transglutaminase with the title:

### ***“Transglutaminase 2: a double face enzyme”***

The first special edition on transglutaminases in 2009 marked the 50<sup>th</sup> anniversary of the discovery of *Transglutaminase 2*. The second special issue: “*Transglutaminases: Future perspectives*”, was published in 2013. Following the success of these initiatives the editor of the section “*Polyamines and Transglutaminases*” S. Beninati, together with two leader scientists of this field, M. Piacentini and C.M. Bergamini are sponsoring this 3<sup>rd</sup> special edition of the journal *Amino Acids* (IF 2014 3.293).

The editors would like to dedicate this new issue to the memory of Prof. Alberto Abbruzzese Saccardi, who passed away on 26 October 2012.

The issue will be focused to specific reviews and full papers on **Transglutaminase 2** “.

We are pleased to invite you to contribute to this event, submitting a manuscript dealing with your field of research on **Transglutaminase 2 (Deadline 31<sup>st</sup> of March, 2016)**. **Your contribution will be subject of a peer-review prior confirmation of acceptance\***

Please send as soon as possible a tentative title of your contribution ([beninati@bio.uniroma2.it](mailto:beninati@bio.uniroma2.it))

Looking forward to receiving your response

Roma, 16 November 2015

Sincerely yours

S. Beninati  
(Field editor)

M. Piacentini and C.M. Bergamini  
(Guest editors)
