

## ***"Transglutaminases in Health and Disease"***

**1<sup>st</sup> Call for papers 2018**

Special edition of "*Medical Sciences*" by  
*S. Beninati and C. Mischiati (guest editors)*

*Medical Sciences* is pleased to announce the publication of the special issue addressed to the scientific community working on transglutaminase with the title:

### ***"Transglutaminases in Health and Disease"***

We are pleased to invite you to contribute to this Special Issue, "Transglutaminases in Health and Disease", which will be published in the international journal *Medical Sciences*. *Medical Sciences* is an international open access scientific journal, providing platform for advances in basic, translational and clinical research. Citations are available in PubMed and full-text are archived in PubMed Central. The journal aims is to publish original research, review articles and short communications about molecular and cellular processes in disease, in order to increase understanding of the fundamental principles and biological questions of medicine.

The journal "*Medical Sciences*" was created recently, so it has not yet obtained an IF, while being mentioned on PubMed. Other journals of the same publisher, have currently obtained an IF of more than 2. So it is reasonable to suppose an upcoming IF. We mention that the publication of articles in this Special Issue is free of charge and will be offered in an open format.

The objectives of this Special issue on "Transglutaminases in Health and Disease" are to publish and collect both experimental and theoretical contributions from original and high-quality research articles and encourage researchers to investigate topics in the field of transglutaminases in various diseases.

You may contribute to this event, submitting a manuscript dealing with your field of research on **Transglutaminase (Deadline 30<sup>th</sup> of September, 2018)**. Your contribution will be subject of a peer-review prior confirmation of acceptance\*

Please send as soon as possible a tentative title of your contribution\*\*

Looking forward to receiving your response

Roma, 9 May 2018

Sincerely yours

*S. Beninati & C. Mischiati*
